JSTOR is a not-for-profit service that helps scholars, researchers, and students discover, use, and build upon a wide range of content in a trusted digital archive. We use information technology and tools to increase productivity and facilitate new forms of scholarship. For more information about JSTOR, please contact support@jstor.org.

Your use of the JSTOR archive indicates your acceptance of the Terms & Conditions of Use, available at <https://about.jstor.org/terms>

JSTOR

The MIT Press is collaborating with JSTOR to digitize, preserve and extend access to *Computer Music Journal*

Instructions to Contributors

These instructions apply to articles. (To submit a review, see computermusicjournal.org/reviews and follow the link labeled "Guidelines for CMJ Reviewers.") Manuscripts must be submitted on the Web at cmjdb.com. First register as an author, then log in and select "New Submission." If you have questions or receive no acknowledgment within one week, please contact the Editor at cmj-editor@mit.edu, with a subject line that includes "[CMJ MS]." Optional hard-copy materials may be sent to Douglas Keislar, Editor, *Computer Music Journal*, 2550 9th Street #207-B, Berkeley, California 94710, USA.

Before submitting a manuscript, study the *Journal's* guidelines, manuscript template, and style and spelling guide at mitpressjournals.org/page/sub/comj.

Manuscripts are accepted with the understanding that the editors may revise them for clarity and to conform to the *Journal's* style. Manuscripts are peer-reviewed by at least two anonymous referees, and authors are sent proofs before publication.

Copyright Policy. Manuscripts are received with the understanding that they represent original material, are not being considered for publication elsewhere, and will not be posted to the Internet nor otherwise publicly distributed, except by MIT Press. Authors will be requested to sign a transfer of copyright to MIT so that authors and publishers may be protected from misuse of copyrighted material. If an earlier version has been or will be published in conference proceedings, please send that version as well; extensive rewording and substantive additions are required.

Anonymity. The manuscript must be submitted as an anonymous PDF file. The PDF document properties must not include the author's name or institution. (See "Ensuring a Blind Peer Review" during the online submission process.) In the manuscript itself, omit the by-line, author addresses, acknowledgments, and unnecessary mentions of your institution. Also replace each obvious self-citation with "Reference removed for anonymity," but retain the year. Delete the corresponding item from the References list. Also submit a supplementary file, for the editors

only, that lists all the deleted material, being sure to deselect the checkbox labeled "Present file to reviewers."

Specifications. Please put your text into the *Journal's* Word (preferred) or LaTeX template, then apply the appropriate style to every paragraph, including headings, code examples, references, etc. Start with an abstract of about 200 words. All material should be double-spaced, including references and figure captions. Put page numbers in the page header or footer. In the page setup, use Letter size, not A4. The submitted material should not exceed 25 pages, including references and figures. If possible, insert figures into the document where first discussed; otherwise, supply figures separately and use clearly visible figure callouts in the text, e.g., "(INSERT FIGURE 3 ABOUT HERE)." Generate a PDF file from the Word or LaTeX version.

Editing Guidelines. Articles should be presented in a formal essay style, with a single flow of text. Use parenthetical expressions sparingly, and write in complete sentences. The *Journal* uses neither footnotes nor lists of bulleted items.

There are, at most, three levels of headings. Sections are not numbered. Their titles are printed with initial uppercase letters on all important words (not all uppercase).

The running text must mention each figure and table: e.g., "Figure 3 demonstrates this dependency." The first mentions must appear in the same order as the figures and tables.

Italicize the first use of a new term or item of jargon; do not use italicization or fonts for emphasis. Program code, however, uses a fixed-width font.

References. Cite references in the text by author's last name and year of publication, in parentheses with no comma. Multiple citations from the same author are separated by commas, e.g., "(Castine 2004, 2006)." Citations from different authors use semicolons, e.g., "(Roads 1981; Roads and Pope 1997)."

References should be listed (unnumbered) alphabetically—chronologically for a particular author—at the end of the article. List cited references only.

The *Journal* uses the *Chicago Manual of Style* format, with periods separating most items:

Feller, R. 2011. "Formatting References." *Computer Music Journal* 13(3):51–55.

Cahill, M., and B. Terry. 1996. "All about References." *Proceedings of the 1996 International Computer Music Conference*, pp. 51–54.

Wyse, L., G. Tzanetakis, and D. Van Nort. 2004. *Book References*. New York: John Wiley and Sons.

See the style guide for more examples.

Algorithms. The *Journal* publishes algorithms but not program listings. Algorithms should be described in a well-known programming language and thoroughly commented (i.e., more English than program). To prevent incorrect line breaks, lengthy examples are usually presented as figures.

Art. Please submit all artwork as grayscale computer files. Diagrams reliant on color must be avoided. We require EPS (Encapsulated—not plain—PostScript) for line art, such as graphs, and TIFF (266 dpi minimum, at the desired print size) for bitmaps, such as photos and screen images. Avoid converting bitmaps to EPS, or line art to TIFF. To ensure legibility of line art, line settings should be no thinner than 0.5 points. The first word of each label in the artwork should start with an uppercase letter.

For the initial submission, place figures in-line in the manuscript. Upon acceptance, each figure must be supplied in a separate file, without the figure caption or figure number. Each subfigure must be in its own file, without the subfigure letter, e.g., "(a)" or "(b)." Include a README file describing the art files, their captions, and the programs that generated them.

Media Examples. Media examples that supplement the manuscript are encouraged. The manuscript should explain the examples. Contact the Editor about how to provide media files. Data files and software may also be provided.

Style. For all other questions of style, please refer to the *Journal's* style guide and to *The Chicago Manual of Style* (University of Chicago Press).
